Astro is a calm, sophisticated, and noiseless sans serif. We call it “neo-humanist sans serif”. It’s combined humanist sans serif’s classical and elegant form with a minimal sequence of neo-grotesque sans serif organized by the vertical lines. While the traditional sans serif gives readers heavy and mechanical impression, this typeface will give them smooth and ultramodern impression. Additionally, it has 20 weights to control visual gravity perfectly. So, designers can set letters to give the same impression to readers on from microchips to spaceships.

About the Foundry

Detail Type foundry (Detail) is an international type foundry. We are the type design institute of *Kamimura & Co.*, an independent design studio based in Japan. We create retail fonts and custom fonts for companies, brands, and projects. Originally, Detail has been started with the type design practices of Makoto Kamimura, a graphic designer and the founder of the studio. He has created visual identities for many different clients. We provide our users with fine details. The unique typefaces are always great assistants to build the brand's identity. We create the typefaces, not only for many different designs and but also for the new cultures. We are always together with the people who are working at the great endeavors.

Detail's retail fonts are available only on *detail.tf*.
If you need custom fonts, please contact us.

Licensing

See *detail.tf* for more information.
